Pasuruan, East Java, Indonesia

Adaptable and responsible Software Developer with hands-on experience in building and deploying end-to-end applications, including backend systems, mobile applications, payment gateway integration, and IoT-based real-time data processing. Strong learning agility, problem-solving abilities, and experience working on real-world projects using modern development tools and frameworks.

Work Experiences

CV Global Solusindo - Malang, Jawa Timur

Dec 2025 - Feb 2026

Fullstack Developer

CV. Global Solusindo is an information technology company specializing in custom software development, IT consulting, electronics development, system maintenance, and research services. The company delivers web, mobile, desktop, and embedded system solutions for business, academic, and industrial needs.

- Developed an Android-based POS system using Flutter and Laravel, delivering 20+ core business features within 1 month.
- Integrated Midtrans payment gateway and REST APIs, enabling real-time digital transactions across mobile and backend systems.
- Engineered ESP32 and HX711 integration using C, achieving real-time weight transmission via WiFi with API-based processing.
- Designed database architecture and backend services independently, supporting 100% of project requirements within the initial development scope.

Kriingg - Malang, Jawa Timur

Jun 2025 - Aug 2025

Web Developer Intern

Kriingg is a Super App that provides food delivery, grocery shopping, digital payments, and a marketplace for local SMEs in one platform. The company empowers local businesses with digital solutions and offers flexible income opportunities for delivery partners, creating a connected and innovative ecosystem.

- Developed authentication and RBAC features supporting 3 user roles (Admin, Driver, Merchant).
- Built CRUD modules across 3 operational dashboards, integrating AWS S3 and Leaflet.js.
- Implemented media storage and location selection features, improving operational workflow efficiency.

Dungeon Education - Malang

May 2024 - Dec 2024

Backend Developer

Dungeon Education is a tech-focused e-learning platform offering practical courses such as Java OOP, PHP, Flutter, and web development to help learners succeed in today's digital era.

- Developed authentication and password recovery features supporting 100% of user onboarding workflows.
- Built admin management modules with CRUD functionality for users and learning content.
- Implemented a ranking system to automatically calculate and display user performance metrics.
